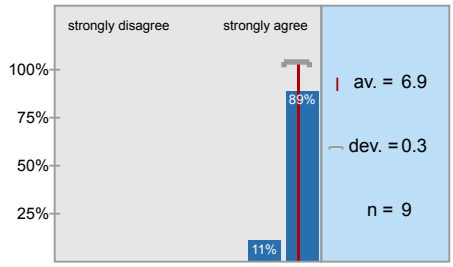
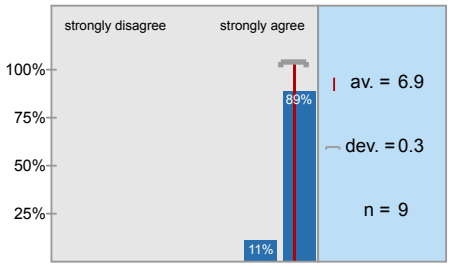
## Histogram for scaled questions

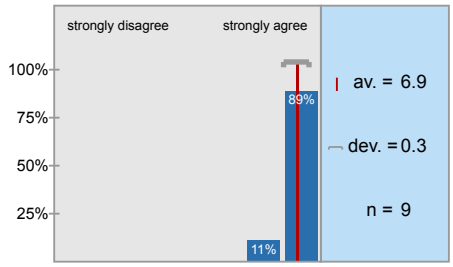
This instructor was effective overall.



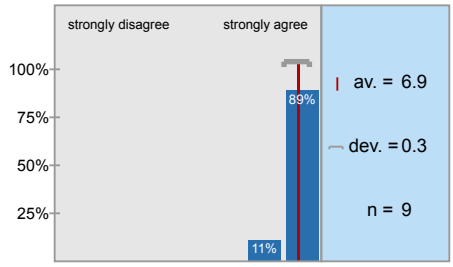
The instructor's explanations were clear.



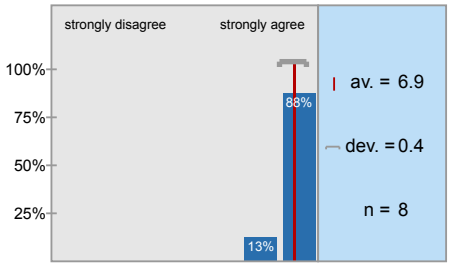
In this class, I was treated with respect.



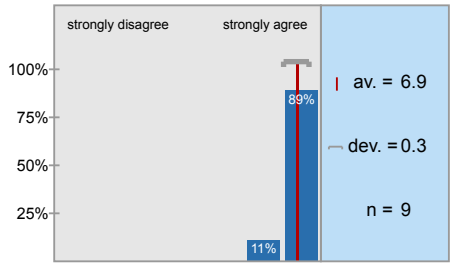
Materials used in this course (text, readings, notes, websites, etc.) were useful.



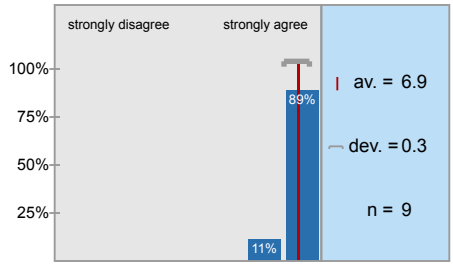
Assigned work was valuable to my learning.



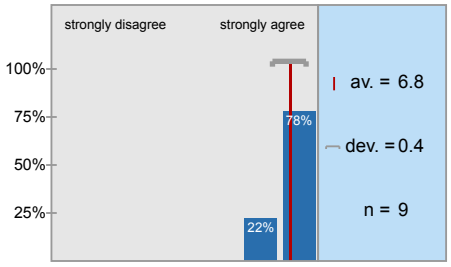
This class was well organized.



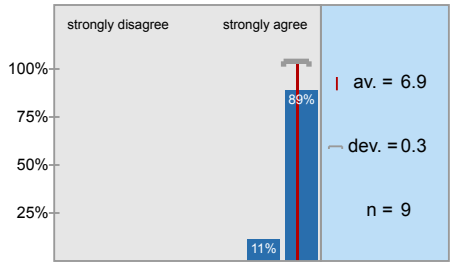
I knew what was expected of me in this class.



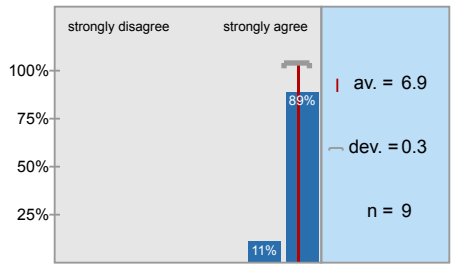
The instructor was well prepared for class.



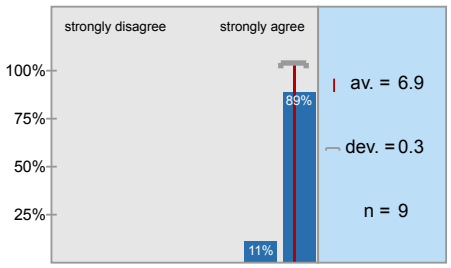
There was sufficient time in class for questions and discussion.



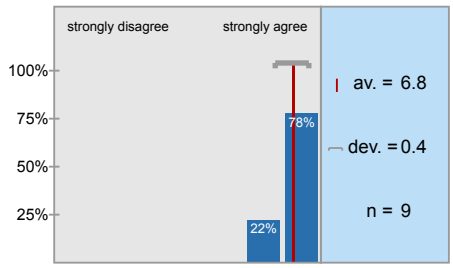
The instructor displayed enthusiasm for the subject matter.



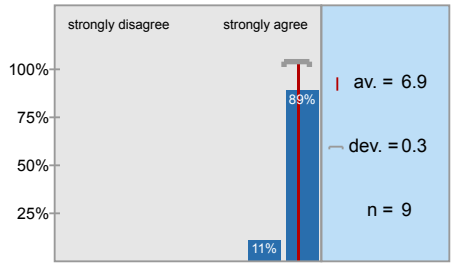
Methods of evaluation in this course were fair.



Feedback on my work was valuable to my learning.



The instructor was available for consultation outside class.



I learned a great deal in this course.

av.=6.4 dev.=1.2

## Comments Report

### 3. Open Response Questions:

3.1) What do you like most about the course and instructor?

- Her enthusiasm even when students were not exactly.... proactive is something I have never seen in my years of schooling. Excellent instructor with a very positive aura. Instructions and explanations were very clear.
- I like how the instructor gave us lots of examples to help us understand the concept more. Also I like how she showed us videos that help us see that the course is applied to real life and not just on paper.
- I liked how enthusiastic the professor was with the material that she was teaching us.
- It was easy to follow a long and was able to understand most of it. Any questions I had was easy to ask and not feel judged or bad for being wrong.
- Overall I loved this class, for the first time I actually felt like I understood math. I really like how she explained everything clearly and always made sure that we understood everything before moving on. Overall a very good experience. I can not explain how nice it felt to do well in math for once.
- The course was well planned out although it was a summer course. The material was interesting, only thing I disliked were the 4 hour courses.
- The instructor was very helpful and always willing to help her students in any situation.
- This instructor has a wise method of teaching and engaging with her students. She always makes sure each of her student understand the material that are being taught by providing multiple ways of guidance; by asking student to give a weekly evaluations on the current lesson plan, flexible office hours, and outside teaching strategies that are not so traditional. For instance, the pattern of the class really helps us students enjoy the coursework by not having a straight forward lecture but participation that test your idea of everything. Because, there are in-class worksheets, homework, and quizzes that are accounted and really prepare you for those incoming exams that determine your grade . Also, the class is fairly understood by the capability of a student, not just an exam to rely on the knowledge obtained but actual work habit and attended effort. This instructors level of teaching is how a college course should be like.
- very friendly made class fun and enjoyable. knowledgable about the subject and explained in clear and concise manner. class was challenging but fair

3.2) What could the instructor do to improve the course, if anything?

- Nothing
- Don't be worried to call on people or make it part of participation so people will answer questions.
- Go over the worksheets or give us the answers to the worksheets she gave us at the end of class.
- If anything, a little more preparation, but besides that, everything was fine.
- No need to improve on anything.
- Perfect instructor for a summer course. If only she had more students to work with.
- The only thing I would change would be how in some of the slides all of the steps are not show, like the final answer isn't shown. Also when there is a lot of words on the slide it was a bit hard to find what you are looking for. An example would be when the problem is on every slide.
- nothing.

3.3) Other comments or suggestions.

- Great class
- N/A
- No other comments.
- This is only your second time teaching? :)
